

WHAT IS CLAIMED IS:

1. A retractable awning for mounting on a support surface comprising in combination:

a mounting rail for attachment to said support surface,

5 an awning sheet having inner and outer edges with the inner edge secured to
said mounting rail,

an outer rail secured to said outer edge of said awning sheet such that said awning sheet can be selectively wrapped or unwrapped about means in said mounting rail or outer rail, said outer rail having opposite ends and an end cap on each of its opposite ends, said end caps each including a light source, a speaker and connection
10 systems for respectively connecting said light source and speaker to a power source and an audio source, and

a support system operatively interconnecting the support surface and the outer rail to allow the awning to be moved between extended and retracted positions.

2. The awning of claim 1 wherein each of said end caps further includes a
15 mounting bracket for attachment to a respective end of said outer rail and a housing mounted on said mounting bracket, said housing including openings through which light from said light source and sound from said speaker can pass

3. The awning of claim 2 wherein said light sources and speakers are operably mounted on a respective one of said mounting brackets.

20 4. The awning of claim 3 wherein each of said end caps further includes a mounting box for supporting said light source and said speaker and further wherein said mounting box is secured to said mounting bracket.

5. The awning of claim 3 wherein said housings are two piece housings forming a contiguous extension from the respective ends of said outer rail.
